Summary

My journey with software started at the age of six with computer games and has led me to become a **Security Engineer** specialized in cybersecurity. I graduated from Karadeniz Technical University with a degree in Computer Engineering and have gained experience in both software development and cybersecurity. I have built strong software solutions using technologies such as React, Redux, Angular, C#, .NET, Node.js, and MongoDB. I have also worked with Trend Micro security products (Deep Discovery, Apex One, Email Inspector, etc.). My goal is to apply my creativity, problem-solving skills, and security expertise to new challenges.

Experience

Fener Teknoloji ve Danışmanlık A.Ş. 08.2024 – Present

Security Engineer & Network Security Specialist. Worked on security projects using Trend Micro solutions, focusing on email, endpoint, and network security.

Freelancer Web Developer 02.2023 – 06.2024

Developed web projects using React.js, Next.js, AngularJS, and .NET. Built a customer management system with Node.js, React.js, and MongoDB.

SmartCV-Mobixa Software 05.2022 – 02.2023

Frontend Developer. Resolved issues in an existing MVC project and developed the frontend of an E-Learning platform from scratch using React.js.

SmartCV-Mobixa Software Internship 03.2022 – 03.2022

Software Engineering Intern. Rebuilt the company's landing page using Bootstrap.

State Airports Authority Internship 07.2019 – 09.2019

Hardware Intern. Performed server updates and provided technical support for staff issues.

Projects

Customer Management System

Developed a customer management system for a company using Node.js, React.js, and MongoDB.

E-Market Link

E-commerce website built with Angular and .NET Core (using Core UI and RxJs).

Pokedex App Link

A Pokémon application built with React and Redux, deployed on Netlify.

To-Do List App Link

To-do list application built with React and Redux.

Weather App Link

Weather website developed using WeatherAPI (via RapidAPI).

Skills

Software Technologies	Angular, React.js, Redux, Next.js, Node.js, MongoDB, C#, .NET, HTML, CSS, JS, Python
UI Frameworks	Core UI, Metronic, Material UI, React Bootstrap
Cybersecurity	Trend Micro Deep Discovery, Apex One, Email Inspector, Network Security, Endpoint Security, Cloud Security, Email & Collaboration Security, Security Operations, Cyber Risk Exposure Management

Certifications

Trend Micro: Vision One XDR Advanced (2025–2027), Cyber Risk Exposure Management, Network Security, Platform Security, Endpoint Security, Cloud Security, Email & Collaboration Security, Security Operations
Kron: Sales Expert, DAM & DDM Expert, PAM Expert
Others: Coderbyte Mid-level React Dev (2024), VakıfBank Fullstack Bootcamp (Patika.dev, 2023), HackerRank Angular (Intermediate), C#, React Frontend

Education

2016 – 2022 **Karadeniz Technical University** B.Sc. in Computer Engineering (GPA: 2.92/4.0)
